TARRYTOWN . . . NEW YORK

OFFICE AND FLOWER SHOP

Our office and flower shop are at Tarrytown, New York, which is our post office address, where all communications should be sent. We have here one of the finest flower shops in the country, erected in 1914. From this part of our establishment we distribute to our customers the choicest roses, carnations, and other flowers in season, fresh from our own greenhouses.

Our main greenhouse establishment at Scarborough, is one of the largest in the United States. The greenhouses are of immense size, each covering half an acre, and are devoted to the culture of cut flowers, with which we supply the markets of New York and other cities. Our greenhouses at Tarrytown are devoted to the growing of the finest Pierson ferns and other varieties, of which we make a specialty, also palms and other decorative plants. Our Rockwood Hall greenhouses are located midway between Tarrytown and Scarborough, and are principally devoted to the growing of flowering and bedding plants; Begonias, Cyclamen, Easter Lilies, Hydrangeas, Geraniums, Heliotrope, etc. In addition to the greenhouses at Scarborough, Tarrytown and Rockwood Hall, we have a very large rosehouse at Millwood, at the junction of the Bronx River Parkway Extension and the Saw Mill River Road, devoted to the growing of roses.

We give particular attention to floral decorations. Our staff of artists in this department are experienced in this line of work, and can arrange artistically flowers and plants for all occasions.

NURSERIES

Our main nursery, comprising fifty acres, is at Scarborough, which is on the N. Y. C. & H. R. R. R., five miles north of Tarrytown. Thus the grounds are very accessible to those who wish to reach them by the railroad and, as they extend from the railroad station at the river to Broadway, or the Albany Post Road, along which they extend two-thirds of a mile, they are also very conveniently located for those who wish to reach them by automobile.

Our nursery at Yorktown Heights, comprising one hundred and fifty acres, is located on Lafayette Avenue, just west of the Saw Mill River Road and about one-half mile east of the Bronx River Parkway. Here we have growing thousands of the finest evergreens, shrubs and trees, spaced sufficiently to insure the proper development of each tree and shrub.

Our nurseries are exceedingly interesting when the various shrubs and roses and herbaceous plants are in bloom—from early spring until late fall. Visitors are always welcome.

We make a specialty of Rock Garden Plants, and have a fine variety of them. For list of varieties, see our nursery catalogue.

Our stock of hardy shrubs and trees is very complete, and our collection of rare plants is unexcelled, comprising beautiful specimens—much larger than the usual nursery sizes—and many varieties which few nurseries carry.

We have a particularly fine stock of Boxwood for edging and also fine large specimens; evergreens in variety; also elegant specimens of Hemlocks, Flowering Crab Apples, Dogwoods, Koster's Blue Spruce, etc.

LANDSCAPE DEPARTMENT

Landscape work is a most important feature of our business, including the building of Rock Gardens. Rock Gardens with their many possibilities are among the most interesting types of gardens. These can be constructed on a comparatively small piece of ground, and can be made more effective for the outlay than any other kind of garden. We are prepared to design and carry out any plans for planting. Consult our landscape department for advice and suggestions relative to designing and planting.

TERMS

New customers, unknown to us, who desire to open accounts, must give satisfactory references as to their responsibility.

ROSES

FOR THE

GREENHOUSE

AND GARDEN

Photograph showing blooms of the Rose "Talisman"

Joanna Hill—A splendid saffron yellow rose, deepening to orange yellow at the center. The flowers are produced on strong stems without pinching and it is very productive.

Killarney, Double White—Flowers pure white and similar to the White Killarney but with more petals.

Mrs. Calvin Coolidge—This variety is similar in habit to Ophelia and Mme. Butterfly, but the flowers are deep golden yellow which deepens into a rich orange as the flower develops.

Mrs. F. R. Pierson—This is a wonderful rose. A cardinal red or a very bright crimson. Buds long and pointed, of ideal shape and form. Exceedingly fragrant. Foliage dark green, with strong stems.

Premier Supreme—This variety is a sport from Premier. The color is better than Premier and the flower is more perfect in form.

Above varieties, strong grafted plants, out of 3½-in. pots (ready in May), 75c. each, \$7.50 per dozen, \$50.00 per 100.

We can supply grafted greenhouse grown roses, out of 3½-in. and 4-in. pots, of the following varieties for winter flowering. These are the best varieties for winter flowering, and are grown especially for that purpose. These varieties can also be planted out in the garden in May and June and will bloom this summer and will make large flowering plants for another year.

Briarcliff—This variety is an improved Columbia, deeper in color, a pure pink. Bud is beautifully formed, long and pointed, every flower opening perfectly. Splendid grower, throwing long flowering stems.

Rapture (Improved Butterfly)—Flowers salmon pink, very much brighter and deeper in color than Mme. Butterfly.

Souvenir de Claudius Pernet—Flowers large, very deep lemon yellow. This variety we can only supply in strong budded plants (budded on odorata), 4-in. pots (ready in May), \$1.00 each, \$10.00 per dozen, \$75.00 per 100.

Talisman—The flowers of this variety are cup-shaped and very highly colored. The base of the petal is yellow with shadings of scarlet and crimson toward the center and end of the petals. The flower gradually becomes an old rose pink with darker veining as it develops. It is a very strong, vigorous grower and producer, with long, strong stems.

Templar—A very fine red variety. A good grower and producer.

Above varieties, strong grafted plants, out of 3½-in. pots (ready in May), 75c. each, \$7.50 per dozen, \$50.00 per 100, except where noted.

All plants offered in this list are ready for delivery, unless otherwise specified.

PLANT A GEORGE WASHINGTON MEMORIAL "BICENTENNIAL" TREE

Join the large Army of Tree Planters and plant a tree this Spring in commemoration of the Bicentennial of the Birth of George Washington, the Father of Our Country.

With every tree which is purchased from our Nursery for this purpose, we will present a small copper plaque that can be attached to the tree, showing that the tree is a "Bicentennial Tree."

A large variety of all kinds of trees for this purpose are described fully in our catalogue of Hardy Trees, which will be sent on application, or you may call at our Nurseries and make your own selection.

Pierson's Perfection Lawn Seed

GRASS SEED

The different grass seed mixtures, as well as the separate varieties, here offered are of the finest quality and the highest per cent of germination.

Our special mixtures of lawn seed are noted for their adaptability to different situations and soil conditions, and are used all over the country for the making of the finest private lawns, golf courses, athletic fields, etc. Our mixtures have stood the test for over fifty years, and have given splendid satisfaction, and are composed of the finest re-cleaned grasses of the highest quality and germination. **These must not be compared with cheaper grades, often sold for less money.**

Care should be taken before new lawns are made, that the ground is well enriched and in proper condition for the sowing of the seed. It is very essential in starting new lawns to enrich the ground well with the proper fertilizers like well rotted manure, bone meal, blood and bone, loma, pulverized sheep manure, etc., to insure the best success.

New lawns should be made as early in the spring as weather conditions permit, and can be made up to the time when the hot weather sets in. Lawns should not be made in midsummer, but can again be made in the fall, say from August 15th to September 15th. Some prefer spring, while others prefer fall seeding.

Pierson's Perfection Lawn Seed—Nothing adds so much to the beauty of a country place, as a well-kept, velvety lawn. In order to secure this, it is necessary, in addition to the proper preparing and fertilizing of the soil, to sow the right kind of lawn seed. More disappointment results from the sowing of inferior seed than from any other cause. Our Perfection Mixture is composed of the finest re-cleaned grasses of high quality and as free from impurities as modern machinery can make them, of the kinds that are best adapted for our hot, dry summers, and will quickly form a close velvety turf after being sown. For new lawns, use 120 pounds per acre. One pound will sow 300 to 400 square feet. Where quick results are required, the quantity should be increased.
Lb., 60c.; 5 lbs., \$2.75; 20 lbs., \$10.00; 100 lbs., \$45.00.

For Putting Greens—This mixture will be found to be unexcelled. It contains the fine bladed, low-growing and most hardy grasses, which make a close, firm,

green, and lasting turf. **Lb., \$1.25; 5 lbs., \$5.75; 20 lbs., \$22.00; 100 lbs., \$100.00.**

Pierson's Sleepy Hollow Lawn Seed—This mixture is a grade under our Perfection Mixture. It is composed of a good proportion of fine grasses and white clover, and will produce a fine lawn. **Lb., 50c.; 5 lbs., \$2.25; bushel, 20 lbs., \$8.00; 100 lbs., \$35.00.**

For Shady Lawns—It is difficult to grow grass in shady places under shrubs or trees where there is a limited amount of sunlight. Our mixture of shady lawn grass, however, is composed of the grasses that do well in shady places, under trees or close to walls where there is little sun. Where the shade is too dense, and where no grass seed will grow, we recommend the planting of *Pachysandra Terminalis*, which is the best ground cover under trees or shrubs. But under ordinary conditions, our Shady Mixture will do well. **Lb., 70c.; 5 lbs., \$3.25; 20 lbs., \$12.00; 100 lbs., \$55.00.**

Prices quoted on Grass and Clover Seed are for the best quality, and are subject to market changes.

FERTILIZERS

We offer a select list of reliable, well balanced chemical fertilizers. These fertilizers are noted for producing the best growth of various crops. Owing to the scarcity of animal fertilizers, the chemical fertilizers are now used largely in connection with them or separately. These fertilizers produce quick results, and are readily soluble and easily assimilated, and give the plant the proper food for quick development, as well as for continued growing support.

Loma—A high-grade balanced plant food for all crops. It is immediately available, containing the proper proportion of Nitrogen, Phosphoric Acid and Potash to produce quick results. It is exceptionally fine for the top dressing of lawns and for mixing in the soil for greenhouse and garden use; also for the top dressing of Roses, Carnations and other plants grown on benches, or in pots, in the greenhouse. We have tested Loma in our greenhouses and outside, and it has given splendid results, and we would recommend it as an all-around fertilizer.

5 lbs., 50c.; 10 lbs., 85c.; 25 lbs., \$1.75; 50 lbs., \$3.00; 100 lbs., \$5.00. Price for larger quantity on application.

Loma Spreader—Users of Loma will find that, with this special Loma Spreader, it is easy to apply evenly on the grass. It is also very convenient for sowing grass seed. 16-in., \$8.00 each; 30-in., \$15.00 each.

Blood and Bone—A high-grade fertilizer of superior quality for enriching lawns and grass plots. Very desirable for quick and lasting results. Particularly valuable for all garden and farm crops, small fruits, fruit trees, etc.

10 lbs., \$1.00; 25 lbs., \$2.00; bag (100 lbs.), \$6.00; ton, \$65.00.

Florand (Urea)—A highly concentrated nitrogenous fertilizer. Lb., 25c.; 5 lbs., 90c.

Bone Meal—A safe and reliable fertilizer. It is largely used for mixing in potting soil and for top dressing roses, carnations, and other plants grown under glass. It is also splendid for garden use. It is made from hard, dry bone, is perfectly pure and entirely free from acid.

10 lbs., 90c.; 25 lbs., \$1.75; bag (100 lbs.), \$5.00; ton, \$60.00.

Pulverized Sheep Manure—Fine for top dressing or for mixing with the soil for greenhouse or garden use; also for top dressing lawns, grass plots, etc., and for making liquid manure.

10 lbs., 80c.; 25 lbs., \$1.50; bag (100 lbs.), \$4.50; ton, \$60.00.

Nitrate of Soda—5 lbs., 60c.; 25 lbs., \$2.00; 100 lbs., \$6.00.

Nitrophoska—A very high-grade immediately available fertilizer, high in nitrogen. Lb., 25c.; 5 lbs., 90c.

Stim-U-Plant—An odorless plant food in tablet form for fertilizing all kinds of growing plants in the home or garden. It is particularly desirable for use on all house plants.

Package containing 30 tablets, 25c.; 100 tablets, 75c.; 1,000 tablets, \$3.50.

Prices quoted on Fertilizers are for the best quality, and are subject to market changes.
